

## \$WSC The Cat Of Wall Street

### White Paper

#### # Presentation :

We are a team of people with solid experience in the field of cryptocurrencies.

After observing the development of the Solana ecosystem, we decided to choose this blockchain to launch our project.

#### # Why Solana ?

Solana was chosen for several reasons:

- Proof of Stake (PoS): Unlike Bitcoin and its Proof of Work, Solana uses Proof of Stake, which makes transactions faster and less energy-intensive.
- Speed: Solana offers impressive transaction speeds, which is essential for an ambitious project like ours.
- Potential: Solana's potential for growth and innovation makes it an ideal platform for our project.

## **# Our vision:**

We chose the cat as the symbol to represent our project, as it embodies values of loyalty and independence.

Inspired by Jordan Belfort's character, our project aspires to success while remaining true to the principles of freedom and independence, which were at the heart of Satoshi's original vision for cryptocurrency.

The 2 together the cat and the Belfort character will surely make an explosive cocktail in the crypto ecosystem.

We believe in system independence, investment freedom and working with our shareholders to create value.

Unlike a traditional project requiring capital IRL (in real life), we want to avoid dependence on traditional financial systems to stay in line with our values and convictions.

## **# Evolution :**

WSC aims to be a memecoin in spirit, but with a solid structure to build an engaged community. Here's our detailed roadmap:

### **# Phase 1 :**

Up to 1M market cap

- Goal: Build and consolidate a community.
- Strategy: Develop marketing initiatives to attract and engage investors.

### **# Phase 2 : Reach 5M market cap**

- Goal : Transition to a defined utility for the token.
- Strategy: Consultation with investors to choose from three token utility proposals.
- Bonus for Holders: Offer certification NFTs (100 copies) to our oldest and most influential investors.  
Top 100 holders

### **# Phase 3: Reaching 10M market cap**

- Goal : Integration of the utility into real life.
- Strategy: Once the supply has been fully diluted among our early members and the base solidified, launch the deployment phase of the utility project.
- Transition: Officially become WCS, with tangible real-world impact.

### **# Phase 4 : From 50M to 100M market cap**

- Goal : Aim for the symbolic milestone of 1 billion market cap.
- Strategy:
  - \* Listing on major exchanges.
  - \* Intensive marketing campaigns.

- \* Development and implementation of surprises and benefits for the community, taking into account the utility chosen by survey among WSC community members.
- \* Strengthening strategic partnerships and collaborations to extend our reach and influence.

### **# Conclusion :**

Investing with us means sharing our values of freedom, independence and loyalty.

It also means having a voice in defining the future utility of our token and participating in a long-term collective adventure, similar to a second family. Together, we will build a sustainable and innovative project on the Solana blockchain.
